IT Service Delivery Lead

WORK EXPERIENCE

Pro4ia Inc

IT Service Delivery Lead

04/2023 – Present | New York, United States | Remote

- Orchestrated high-volume service operations for 100+ client companies by triaging, correctly classifying, and assigning 1,000+ tickets per week in ConnectWise, matching tasks to 25–30 engineers' specialized system/network strengths, achieving sub-1-minute response times and maintaining 99.9% SLA compliance through proactive monitoring and escalation alerts.
- Safeguarded service level agreements at 99.9% adherence by continuously monitoring ticket queues, identifying impending SLA risks, alerting engineers for immediate action, and preventing breaches.
- Served as central operational liaison across clients, engineers, and sales teams — handling first-line calls, creating tickets from incoming requests, coordinating >5 onsite visits per week, and facilitating seamless resolutions via phone, email, or portal.
- Drove engineer accountability and workflow efficiency by managing calendars/queues, reassigning tasks for absent engineers, and utilizing ConnectWise custom views and BrightGauge dashboards to track real-time SLAs and performance metrics.
- Led full lifecycle management of change requests and incidents for a major U.S. solar/wind client in ServiceNow, handling >15 change requests and 100–200+ incidents per week (creation, assignment, manual syncing to ConnectWise, approval, progression, verification, and cross-team coordination).
- Enhanced client transparency by generating detailed ticket status reports, sending daily updates, and conducting quarterly warranty renewal/replacement communications for >100 devices.
- Delivered actionable business intelligence through ConnectWise views and BrightGauge reporting, monitoring ticket trends, SLA performance, and operational KPIs.
- Provided effective first-level technical triage by diagnosing basic hardware, network, connectivity, email, and software issues during initial client interactions, clearly communicating steps to engineers.
- Continuously improved service processes by identifying recurring issues in ticket documentation, statuses, and workflows, notifying relevant teams for corrections, and implementing fixes that reduced errors and optimized MSP-wide efficiency.

Protech

Network Engineer

01/2022 – 04/2023 | Tirana, Albania

- Monitored network, routers, switches, servers, peripherals and telecommunications equipment.
- Managed Linux servers in CentOS, Debian, and Ubuntu; created and configured servers for clients.
- Identified and implemented efficient, reliable system standards and applied best practices in effective monitoring.
- Led resolution of complex network and server issues using appropriate diagnostic procedures.
- Configured and managed firewall rules; monitored LAN & WAN network stability and traffic trends.
- Communicated effectively with customers and management; performed work within set SLAs with minimal supervision.

Sela & Drini SHPK

IT Specialist

01/2021 – 01/2022 | Tirana, Albania

- Maintained 50+ Windows computers and peripherals; worked with vendors to cut equipment costs by 20%.
- Installed 20+ desktop computers during a company-wide upgrade.
- Designed and implemented new connectivity network configurations that increased overall network capabilities by 10%.
- Kept 250 employees on Windows 10 operational; resolved customer complaints at a 12% higher success rate than the corporate average.

Freelance

IT Support Specialist

01/2020 – 01/2021 | Tirana, Albania

- Handled a high volume of desktop support issues and managed trouble tickets independently.

Fiverr

Video Editor

01/2017 – 01/2019 | Remote

- Sourced new royalty-free music, video, and still-image vendors, saving 30% on costs and doubling production quality.
- Edited movies and films with music, sound effects, and narration.
